~~Park and TreeType can be the root element.~~

Park is better for root element.

XML document with sample data.

~~<Park name="abc" size=100>~~

<?xml version="1.0" encoding="UTF-8"?>

<Park name="abc" size=100>

<TreeLocation volume=100 longitude=10 latitude=20>

</TreeLocation>

<TreeType name="banyan" maximumHeight=100
averageLifeInYears=200>

<TreeTypeInPark number=100 planted=10:03:20>

</TreeTypeInPark>

</TreeType>

</Park>
